

**MECHANICAL
SEPARATORS**

ALLMEAT

SOLUTIONS

HISTORY OF MDM

The practice of mechanically harvesting leftover meat scraps dates back to the 1950s, when mechanical hand tools were used to help remove the remaining pieces of meat and connective tissue from animal carcasses to minimize waste. By the 1960s, automatic machines were developed to do this more efficiently. By automating this process, it has allowed companies to use previously wasted materials and sell the derived meat products to the public for a lower price. As this process has proven to provide companies with high financial gains, many newcomers are entering the mechanically-separated-meat-processing market.

PREMIUM TEXTURED MDM PRODUCT

ALLMEAT Machines produce high quality recovered meat with great binding structure

Benefits:

- Higher yields
- Low calcium and bone count
- No pre-breaker required

ALLMEAT Mechanical Separators

ALLMEAT Product Line
includes Separators
with Input capacities
250 to 10,000 kg/h
(power: 10 to 100 Hp)

Our separators
mechanically debone
chicken, pork, turkey & fish
with maximum yields

A1580SBS
Capacity 2000 - 2500 kg/h

ALLMEAT Separator Benefits:

- Exceptional high yield (90%+ depending on raw material)
- Provides optimum texture with lowest calcium and bone
- Very low temperature rise
- Compact Design / Small Footprint
- Heavy -duty, high-quality construction ensures long machine life
- Easy to assemble and disassemble
- Low maintenance
- Equipped with industry's top quality drives

ABOUT

ALLMEAT Solutions designs, manufactures and sells food processing equipment.

We specialize in high quality, heavy duty mechanical separators for the meat processing industry.

Our extensive knowledge and years of experience in the meat processing industry enables us to offer our customers a line of highly-engineered mechanical separators which produce top quality recoverable meat.

Located in Ontario, Canada, one of North Americas most developed manufacturing hubs, our 10,000 sq/ft manufacturing facility has the capacity to produce orders in an expedited manner. As we are a small family business, our customers can benefit from our prompt and high level of customer service performed directly by our management team. We always put our customers first.

THE ALLMEAT LINEUP

ALLMEAT Model	Capacity (kg/h)	Power (Hp)
A1025	200 - 300	10 (7.5 Kw)
A1050	500 - 700	20 (14.5 Kw)
A1580	800 - 1200	20 (14.5 Kw)
A1150	1500 - 2000	25 (18.7 Kw)
A2250	2500 - 3000	30 (22.4 Kw)
A2350	3500 - 4000	40 (29.9 Kw)
A4500	4000 - 5000	75 (56 Kw)
A5500	8000 - 10,000	100 (75 Kw)
